

Boffa Miskell

SERVICES

LOW IMPACT DESIGN AND STORMWATER INNOVATORS

Boffa Miskell is committed to the integration of ecology, landscape and urban design principles into stormwater management. This approach provides for integrated catchment management, comprehensive site design and innovative 'treatment trains'. Boffa Miskell has particular expertise in designing innovative techniques for re-development including bioretention technologies, vegetated roofs and stream daylighting.

Our LID services include:

- Integrated Catchment Management Planning (ICMP's)
- Low Impact Design (LID) masterplanning
- LID policy development
- LID technical guidelines and codes of practice
- Developing technical guidelines for constructing treatment wetland
- Detailed design and implementation of LID stormwater treatment
- LID technique design and detailing
- 'Stream daylighting' design and implementation
- Devising and supervising 'stream daylighting' and restoration programmes
- Water sensitive urban design

*Improving urban
watershed
management*
